RE: Bannock Paving Company, Incorporated
Portable Hot-Mix Asphalt Plant, Cedarapids #1 (#777-00140)
Portable Rock Crushing Plant, Crusher #1 - (#777-00141)
Tier II Operating Permits

Dear Mr. Edel:

On June 9, 1998, a meeting was held at the Division of Environmental Quality (DEQ) between Bannock Paving Company and DEQ representatives. DEQ and Bannock Paving agreed that a Tier II Operating Permit (OP) should be issued to establish minor source status for co-location of the aforementioned sources. On July 29, 1998, a proposed Tier II OP was issued for public comment. The public comment period was held from July 29, 1998, through August 28, 1998. No comments were received.

Based on review of your application, and state and federal rules and regulations, DEQ finds this project meets the Provisions of IDAPA 16.01.01.400 (Rules for the Control of Air Pollution in Idaho). Enclosed are the Tier II OPs for the Portable Hot-Mix Asphalt Plant, Cedarapids #1 (#777-00140); and for the Portable Rock Crushing Plant, Crusher #1 (#777-00141).

You, as well as any other entity, may have the right to appeal this final agency action pursuant to the Idaho Department of Health and Welfare Rules, Title 5, Chapter 3, "Rules Governing Contested Case Proceedings and Declaratory Rulings," by filing a petition with the Hearings Coordinator, Department of Health and Welfare, Administrative Procedures Section, 450 West State Street - 10th Floor, Boise, Idaho 83720-5450, within thirty-five (35) days of the date of this decision.

If you have any questions regarding the terms or conditions of the enclosed permits, please contact Susan J. Richards, Bureau Chief, Air Quality Permitting Bureau, Air and Hazardous Waste, DEQ, at (208) 373-0502.

Sincerely,

A handwritten signature in cursive script, appearing to read "Orville D. Green".

Orville D. Green
Assistant Administrator
Air and Hazardous Waste

Bannock Paving Company, Incorporated
Tier II Operating Permit
Portable Rock Crushing Plant, Crusher #1

PERMIT NUMBER

7 7 7 - 0 0 1 4 1

The Permittee is hereby allowed to operate the equipment described herein subject to the emission limits and monitoring and reporting requirements specified in this permit.

SOURCE

Portable Rock Crushing Plant, Crusher #1

1. EMISSION LIMITS
1.1 Generator Emission Limit

Sulfur dioxide (SO₂) emissions from the generator stack shall not exceed the emission rate limit listed in Appendix A of this permit.

1.2 Crusher Opacity Limit

Particulate matter (PM) emissions from portable rock crushers shall not exhibit more than fifteen percent (15%) opacity. Opacity shall be determined using the procedures specified in the DEQ's "Procedures Manual for Air Pollution Control".

1.3 Transfer Point Opacity Limit

PM emissions from any transfer point on belt conveyors, or from each grinding mill, screening operation, bucket elevator, belt conveyor bagging operation, storage bin, enclosed truck, or rail car loading station shall not exhibit greater than 10% opacity. Opacity shall be determined using the procedures specified in the DEQ's "Procedures Manual for Air Pollution Control".

1.4 Opacity Limit

Emissions emanating from any stack, vent, or other functionally equivalent opening, shall not exceed twenty percent (20%) opacity for a period or periods aggregating more than three (3) minutes in any sixty (60)-minute period as required in IDAPA 16.01.01.625 (Rules for the Control of Air Pollution in Idaho). Opacity shall be determined using the procedures contained in DEQ's "Procedures Manual for Air Pollution Control".

1.5 Visible Emission Limits at Property Boundary

Fugitive emissions shall not be observed leaving the property boundary for a period or periods aggregating more than three (3) minutes in any sixty (60)-minute period. Visible emissions shall be determined by Method 22, as described in 40 CFR Part 60, Appendix A, or a DEQ-approved alternative method.

2. OPERATING REQUIREMENTS
2.1 Number of Crushers and Generators

The rock crushing facility shall not use more than four (4) crushers and one (1) 1,300-kW generator.

2.2 Facility Throughput Limits

The total aggregate throughput of the rock crushing facility shall not exceed a maximum of 1,662,750 tons per consecutive twelve (12) month period (T/yr).

PERMIT NUMBER

7 7 7 - 0 0 1 4 1

The Permittee is hereby allowed to operate the equipment described herein subject to the emission limits and monitoring and reporting requirements specified in this permit.

SOURCE

Portable Rock Crushing Plant, Crusher #1

2.3 Generator Hours of Operation

The generator shall not be operated more than 2,217 hours per consecutive twelve (12) month period (hr/yr).

2.4 Non-Attainment Area Generator Hours of Operation

2.4.1 The generator shall not be operated more than fifteen (15) hours per consecutive twenty-four (24) hour period (hr/day) when co-located with Portable Hot-Mix Asphalt Plant, Cedarapids #1; in any PM-10 non-attainment area or proposed PM-10 non-attainment area.

2.5 Generator Fuel Limits

The sulfur content of the generator fuel shall not exceed 0.5 percent by weight for #2 fuel oil in accordance with IDAPA 16.01.01.727.

2.6 Reasonable Control of Fugitive Emissions

All reasonable precautions shall be taken to prevent particulate matter from becoming airborne as required in IDAPA 16.01.01.651. In determining what is reasonable, considerations will be given to factors such as the proximity of dust emitting operations to human habitations and/or activities and atmospheric conditions which might affect the movement of particulate matter. Some of the reasonable precautions include, but are not limited to, the following:

- 2.6.1 Use, where practical, of water or chemicals for control of dust in the demolition of existing buildings or structures, construction operations, the grading of roads, or the clearing of lands;
- 2.6.2 Application, where practical, of asphalt, oil, water or suitable chemicals to, or covering of dirt roads, material stockpiles, and other surfaces which can create dust;
- 2.6.3 Installation and use, where practical, of hoods, fans and fabric filters or equivalent systems to enclose and vent the handling of dusty materials. Adequate containment methods should be employed during sandblasting or other operations;
- 2.6.4 Covering, where practical, of open bodied trucks transporting materials likely to give rise to airborne dusts;
- 2.6.5 Paving of roadways and their maintenance in a clean condition, where practical; or
- 2.6.6 Prompt removal of earth or other stored material from streets, where practical.

2.7 Air Stagnation Advisory Days

No operation of the rock crushing facility shall occur during days of Air Stagnation Advisory.

The Permittee is hereby allowed to operate the equipment described herein subject to the emission limits and monitoring and reporting requirements specified in this permit.

SOURCE

Portable Rock Crushing Plant, Crusher #1

2.8 Co-Location

Rock Crushing Plant, Crusher #1 shall only co-locate with Hot-Mix Asphalt Plant, Cedarapids #1. It shall not co-locate with any other facility or portable source without prior DEQ approval.

3. MONITORING REQUIREMENTS
3.1 Operating Parameters

3.1.1 The Permittee shall monitor and record daily in a log, the date and the total throughput of aggregate to the crushing facility in tons per day (T/day). The log shall clearly indicate when the facility is located in a non-attainment area and when the facility is co-located with Hot-Mix Asphalt Plant, Cedarapids #1. The most recent five (5) years' compilation of data shall be kept on-site, in a log, and made available to DEQ representatives upon request.

3.1.2 The Permittee shall monitor and record the date and the generator's hours of operation on a daily basis while operating the generator(s). The log shall clearly indicate when the facility is located in a non-attainment area and when the facility is co-located with Hot-Mix Asphalt Plant, Cedarapids #1. The most recent five (5) years' compilation of data shall be kept on-site, in a log, and made available to DEQ representatives upon request.

3.2 Reasonable Control Measures

The Permittee shall monitor and record in a log, during operation, the periodic method(s) used to reasonably control fugitive emissions from this facility. The log shall include the type of control used (i.e., water, environmentally safe chemical dust suppressants, etc.) as well as the circumstances under which no controls are used. The most recent five (5) years' compilation of data shall be kept on-site and made available to DEQ representatives upon request.

4. REPORTING REQUIREMENTS
4.1 Relocation

At least ten (10) days prior to relocation of any equipment covered by this permit, the Permittee shall report to DEQ, on relocation forms supplied by DEQ, the following information:

- 4.1.1 Exact location of the new site of operations;
- 4.1.2 Start-up date at the new site of operations and the duration of operations at the new site;
- 4.1.3 Equipment to be used at the new site; and
- 4.1.4 A scaled plot plan clearly showing the property boundary of the new site.

APPENDIX A
**BANNOCK PAVING COMPANY, INC.
PORTABLE ROCK CRUSHING PLANT, CRUSHER #1**
Annual (T/Yr) Emission Limits^a

Source Description	SO ₂
	(T/Yr)
Generator	7.2

- a. As determined by a pollutant specific U.S. EPA reference method, or DEQ approved alternative, or as determined by DEQ's emission estimation methods in this permit application.

ISSUED DATE:	SEPTEMBER 11, 1998
EXPIRATION DATE:	SEPTEMBER 11, 2003

TIER II OPERATING PERMIT GENERAL PROVISIONS

- A. All emissions authorized herein shall be consistent with the terms and conditions of this permit. The emission of any pollutant in excess of the limitations specified herein, or noncompliance with any other condition or limitation contained in this permit, shall constitute a violation of this permit and the Rules for the Control of Air Pollution in Idaho, and the Environmental Protection and Health Act, Idaho Code 39-101 et. seq.
- B. The Permittee shall at all times (except as provided in the Rules for the Control of Air Pollution in Idaho) maintain in good working order and operate as efficiently as practicable, all treatment or control facilities or systems installed or used to achieve compliance with the terms and conditions of this permit and other applicable laws for the control of air pollution.
- C. The Permittee shall allow the Director, and/or his authorized representative(s), upon the presentation of credentials:
- 1) To enter upon the Permittee's premises where an emission source is located, or in which any records are required to be kept under the terms and conditions of this permit; and
 - 2) At reasonable times to have access to and copy any records required to be kept under the terms and conditions of this permit, to inspect any monitoring methods required in this permit, and to require stack emission testing (i.e., performance tests) in conformance with state approved or accepted EPA procedures when deemed appropriate by the Director.
- D. Except for data determined to be confidential under Section 39-111, Idaho Code, all reports prepared in accordance with the terms of this permit shall be available for public inspection at the appropriate regional office of the Division of Environmental Quality.
- E. Nothing in this permit is intended to relieve or exempt the Permittee from compliance with any applicable federal, state, or local law or regulation, except as specifically provided herein.
- F. In the event of any change in control or ownership of source(s) from which the authorized emissions emanate, the Permittee shall notify the succeeding owner or controller of the existence of this permit by letter, a copy of which shall be forwarded to the Director.
- G. This permit shall be renewable on the expiration date, provided the Permittee submits any and all information necessary for the Director to determine the amount and type of air pollutants emitted from the equipment for which this permit is granted. Failure to submit such information within sixty (60) days after receipt of the Director's request shall cause the permit to be voided.
- H. The Director may require the Permittee to develop a list of Operation and Maintenance Procedures which must be approved by DEQ. Such list of procedures shall become a part of this permit by reference, and the Permittee shall adhere to all of the operation and maintenance procedures contained therein.
- I. Performance tests (i.e.; air emission source tests) conducted pursuant to testing requirements in this permit must be conducted in accordance with DEQ's Procedures Manual for Air Pollution Control. Such testing shall not be conducted on weekends or state holidays unless the Permittee obtains prior DEQ approval.

The Permittee shall submit a test protocol and a proposed test date for each performance test required by this permit to DEQ for approval at least thirty (30) days prior to each respective test date (including each test date for periodic tests such as, for example, annual tests). The Permittee shall promptly notify DEQ of any change in the proposed test date and shall provide at least five (5) working days advanced notice prior to conducting any rescheduled test, unless DEQ approves a shorter notice period.

Within forty-five (45) days of the date on which a performance test required by this permit is concluded, the Permittee shall submit to DEQ a performance test report for the respective test. The performance test report shall include any and all process operating data required to be recorded during the test period as well as the test results, raw test data, and associated documentation.

The maximum allowable source operating rate shall be limited to 120% of the average operating rate attained during the most recent performance test conducted pursuant to this permit which demonstrated compliance with the respective pollutant emission limit unless: (1) a more restrictive operating limit is specified elsewhere in this permit or; (2) at such an operating rate, emissions would exceed any emission limit(s) set forth in this permit.

- J. The provisions of this permit are severable; and if any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances, and the remainder of this permit shall not be affected thereby.
